

CIGRÉ Technical Brochure

Advanced Angle Stability Controls

Prepared by
Task Force 17
of Advisory Group 02
of Study Committee 38

December 1999

International Conference on Large High Voltage Electric Systems
Conférence Internationale des Grands Réseaux Électriques a Haute Tension

Advanced Angle Stability Controls

Convenor: Carson Taylor (USA)

Members and contributors

Florencio Aboytes (Mexico)
Tom Anderson (Scotland)
Miroslav Begovoc (USA)
Henri Bourles (France)
Joe Chow (USA)
Jeff Dagle (USA)
Peter Donalek (USA)
Suma Geeves (UK)
Paulo Gomes (Brazil)
Adel Hammad (Switzerland)
Michael Henderson (USA)
Takashi Hiyama (Japan)
Satoru Ihara (USA)
Nelson Zeni Junior (Brazil)
Daniel Karlsson (Sweden)
Kwang Lee (USA)
Thibault Margotin (France)
Jim McCalley (USA)
Mojtaba Noroozian (Sweden)
Torben Østrup (Denmark)
Paulo Paiva (Brazil)
Mrinal Pal (USA)
Juan Sanchez-Gasca (USA)
Dick Schulz (USA)
Hisao Taoka (Japan)
Ebrahim Vaahedi (USA)
Louis Wehenkel (Belgium)

Magnus Akke (Sweden)
Göran Andersson (Sweden)
Bharat Bhargava (USA)
Fabio Casamatta (Italy)
Sandro Corsi (Italy)
Art DeGroff (USA)
Carlos Gama (Brazil)
Jan Ove Gjerde (Norway)
Michael Hadingham (South Africa)
John Hauer (USA)
David Hill (Australia)
Michael Hughes (UK)
Lawrence Jones (Sweden)
Innocent Kamwa (Canada)
Prabha Kundur (Canada)
Donald Macdonald (UK)
Nelson Martins (Brazil)
Dagmar Niebur (USA)
Damir Novosel (USA)
John Paserba (USA)
Mania Pavella (Belgium)
Steve Rovnyak (USA)
Pierangelo Scarpellini (Italy)
Jim Smith (USA)
Kjetil Uhlen (Norway)
Lei Wang (Canada)

Contents

1. Introduction and Survey

1.1	Review of power system synchronous stability basics.....	1-2
1.2	Concepts of power system stability controls	1-6
1.3	Types of power system stability control and possibilities for advanced control	1-9
1.4	Dynamic security assessment	1-18
1.5	Intelligent controls.....	1-19
1.6	Effects of industry restructuring on stability controls	1-19
1.7	Experience from recent power failures.....	1-20
1.8	Coordination with other CIGRÉ and industry work.....	1-20
1.9	Summary	1-21

2. Advanced Linear and Nonlinear Control Design

2.1	Nonlinear control.....	2-2
2.2	Linear control techniques	2-4

3. State-of-the-Art in Digital Control

3.1	Review of digital control of dynamic systems	3-3
3.2	Basic structure of digital control systems.....	3-8
3.3	Evolution of excitation control systems through microprocessor technology.....	3-11
3.4	Application of digital control to SVCs.....	3-14
3.5	Trends in digital control	3-19

4. State-of-the-Art in Intelligent Controls

4.1	Fuzzy systems for power system control.....	4-2
4.2	ANN for power system control	4-6
4.3	Decision trees for power system control	4-16

5. Integration of Dynamic Security Assessment and Stability Controls

5.1	On-line dynamic stability assessment design	5-1
5.2	Other integration of DSA and stability controls.....	5-9

6. Measurement and Communication Technology

6.1	Introduction to transducers	6-3
6.2	The signal environment for power system transducers	6-6
6.3	Signal processing in power system transducers	6-10
6.4	Criteria and procedures for evaluating transducer performance.....	6-13
6.5	Transducer modeling and simulation	6-14
6.6	Digital transducers and phasor measurements	6-15

6.7	The transducers as an intelligent electronic device	6-17
6.8	Role of communication channels in wide-area control	6-17
6.9	Observed performance of digital communications in the BPA phasor measurement network	6-19
6.10	Future digital communication for stability control.....	6-22
6.11	Optical sensors	6-22
7.	Applications of Advanced Controls	
7.1	Brazilian north–south interconnection—application of thyristor controlled series compensation (TCSC) to damp interarea oscillation mode	7-1
7.2	Analysis and control of Yimin–Fengtun 500-kV TCSC system	7-3
7.3	Wide-area stability control	7-4
7.4	Active load modulation for stability control	7-7
7.5	Active power modulation of generators and energy storage for oscillatory instability control	7-8
8.	Stability Controls with Industry Restructuring	
8.1	Some examples of new scenarios	8-1
8.2	Coordinated planning and operation in a competitive environment	8-9
8.3	The impact of IPP thermal generation on system dynamic performance.....	8-10
8.4	Other issues related to power system performance in the new utility environment	8-14
9.	Conclusions	
9.1	Conclusions	9-1
9.2	Areas for future work	9-2

Appendices

A	Adjustable speed hydro generation.....	A-1
B	Dynamic performance changes produced by numerical integration algorithms	B-1
C	Space vector, positive and negative sequence vectors	C-1
D	Sideband production in RMS calculations	D-1
E	Basic phasor calculations	E-1
F	Laboratory evaluations of power system transducers.....	F-1
G	Field evaluations of power system transducers	G-1
H	Transducer modeling and simulations.....	H-1
I	Performance of BPA analog communication channels	I-1
J	A new look at damping control	J-1

Chief Editor	C. W. Taylor
Assistant Editors/Readers	G. Andersson and A. E. Hammad

Chapter contributors

Chapter 1:	C. W. Taylor (lead editor), H. Taoka, A. E. Hammad, R. P. Schulz, A. G. DeGroff
Chapter 2:	J. R. Smith (lead editor), M. Akke, L. E. Jones
Chapter 3:	M. Noroozian (lead editor), S. Corsi, P. Paiva
Chapter 4:	D. Novosel (lead editor), D. Niebur, S. M. Rovnyak, J. D. McCalley, T. Hiyama, K. Y. Lee, S. Ihara, C. W. Taylor
Chapter 5:	E. Vaahedi (lead editor), P. Kundur, L. Wang, M. Pavella, P. Scarpellini, K. Cheung, C. W. Taylor
Chapter 6:	J. F. Hauer (lead editor), C. W. Taylor
Chapter 7:	M. Akke (lead editor), L. E. Jones, T. Østrup, I. Kamwa, C. Gama, B. Bhargava, M. K. Pal, R. P. Schulz, C. W. Taylor
Chapter 8:	P. Gomes (lead editor), F. P. de Mello, N. Martins, X. Vieira F., J. F. Hauer, T. Østrup, M. Henderson, K. Uhlen, C. W. Taylor
Chapter 9:	C. W. Taylor (lead editor)
Appendix A	P. J. Donalek
Appendix B	S. Corsi
Appendix C	M. Noroozian
Appendices D–I	J. F. Hauer
Appendix J	M. K. Pal
